

## CLAIMS

I claim:

1. A medical port for an emergency safety resuscitator having a collapsible bag with an outlet, which comprises:

an adapter having a first end available for attachment to and communication with a collapsible bag of a resuscitator and also having a second end;

a tube having a first aperture attached to and communicating with the second end of a collapsible bag of a resuscitator, a second aperture, and a third aperture available for connection to a mask or an endotracheal tube.

2. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 1, further comprising:

a self-sealing membrane releasably covering the second aperture of said tube.

3. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 2, further comprising:

two or more strips of flexible plastic, each strip having a first end attached to the inside of said tube, between the first aperture and the second aperture, and a second end pushing against a second end of at least one other of said strips.

4. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 3, wherein:

said adapter and said tube are constructed of rigid clear plastic.

5. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 4, wherein:

said self-sealing membrane is siliconized.

6. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 3, wherein:

said adapter and said self-sealing membrane is siliconized.

7. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 2, wherein:

said adapter and said tube are constructed of rigid clear plastic.

- 1           8.     The medical port for an emergency safety resuscitator having a collapsible bag  
2 with an outlet as recited in claim 7, wherein:  
3                 said self-sealing membrane is siliconized.
- 1           9.     The medical port for an emergency safety resuscitator having a collapsible bag  
2 with an outlet as recited in claim 2, wherein:  
3                 said self-sealing membrane is siliconized.
- 1           10.    The medical port for an emergency safety resuscitator having a collapsible bag  
2 with an outlet as recited in claim 1, further comprising:  
3                 two or more strips of flexible plastic, each strip having a first end attached to the  
4                 inside of said tube, between the first aperture and the second aperture, and a second end  
5                 pushing against a second end of at least one other of said strips.
- 1           11.    The medical port for an emergency safety resuscitator having a collapsible bag  
2 with an outlet as recited in claim 10, wherein:  
3                 said adapter and said tube are constructed of rigid clear plastic.
- 1           12.    The medical port for an emergency safety resuscitator having a collapsible bag  
2 with an outlet as recited in claim 1, wherein:  
3                 said adapter and said tube are constructed of rigid clear plastic.
